

# Commonwealth Environmental Impact Statement

Attachment I - EIS Map book

The Star of the South Offshore Wind Farm Project's (the project) Environmental Impact Statement (EIS) map book displays the key components from the offshore wind farm area through to the onshore transmission (from south to north), as described in *Chapter 4 - Project description*:

- 1 Offshore project area, comprising:
  - Offshore wind farm area: A 586 square kilometre area extending approximately 10 to 40 kilometres offshore
  - Offshore export cable area: A 232 square kilometre area extending from the offshore wind farm area to the shore crossing
- 2 Shore crossing: Located at Reeves Beach, this is where the offshore export cables will transition to land and connect to the underground cable system onshore.
- 3 Onshore project area: An approximately 30 kilometre corridor extending from the shore crossing to the proposed VicGrid connection hub. Includes an underground cable system within a (common) alignment to Giffard West, at which point there are three alignment options (AB, C and D) to reach the proposed VicGrid connection hub in Giffard.

The map book shows the project area, key components, and the associated area of disturbance. Onshore, the map book shows the difference between the area of disturbance for construction and operation, including the proposed easements within properties.

The map book displays a feasible design for the project as described in *Chapter 4 - Project description* that is the basis of the impact assessments presented in the EIS. Development of the design will progress following the EIS process and is subject to receiving approval for the project. The final design and construction methods will be determined by the preferred contractors to comply with the project approvals and in response to landholder agreements. As such, the final designs may differ to the design shown in this map book.

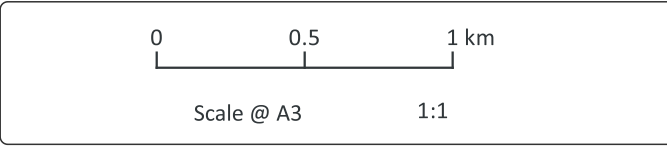

It should also be noted that in some locations the cadastral boundaries may not align with the aerial photos and property boundaries. Final project boundaries will be surveyed, subject to receiving approval for the project.

---

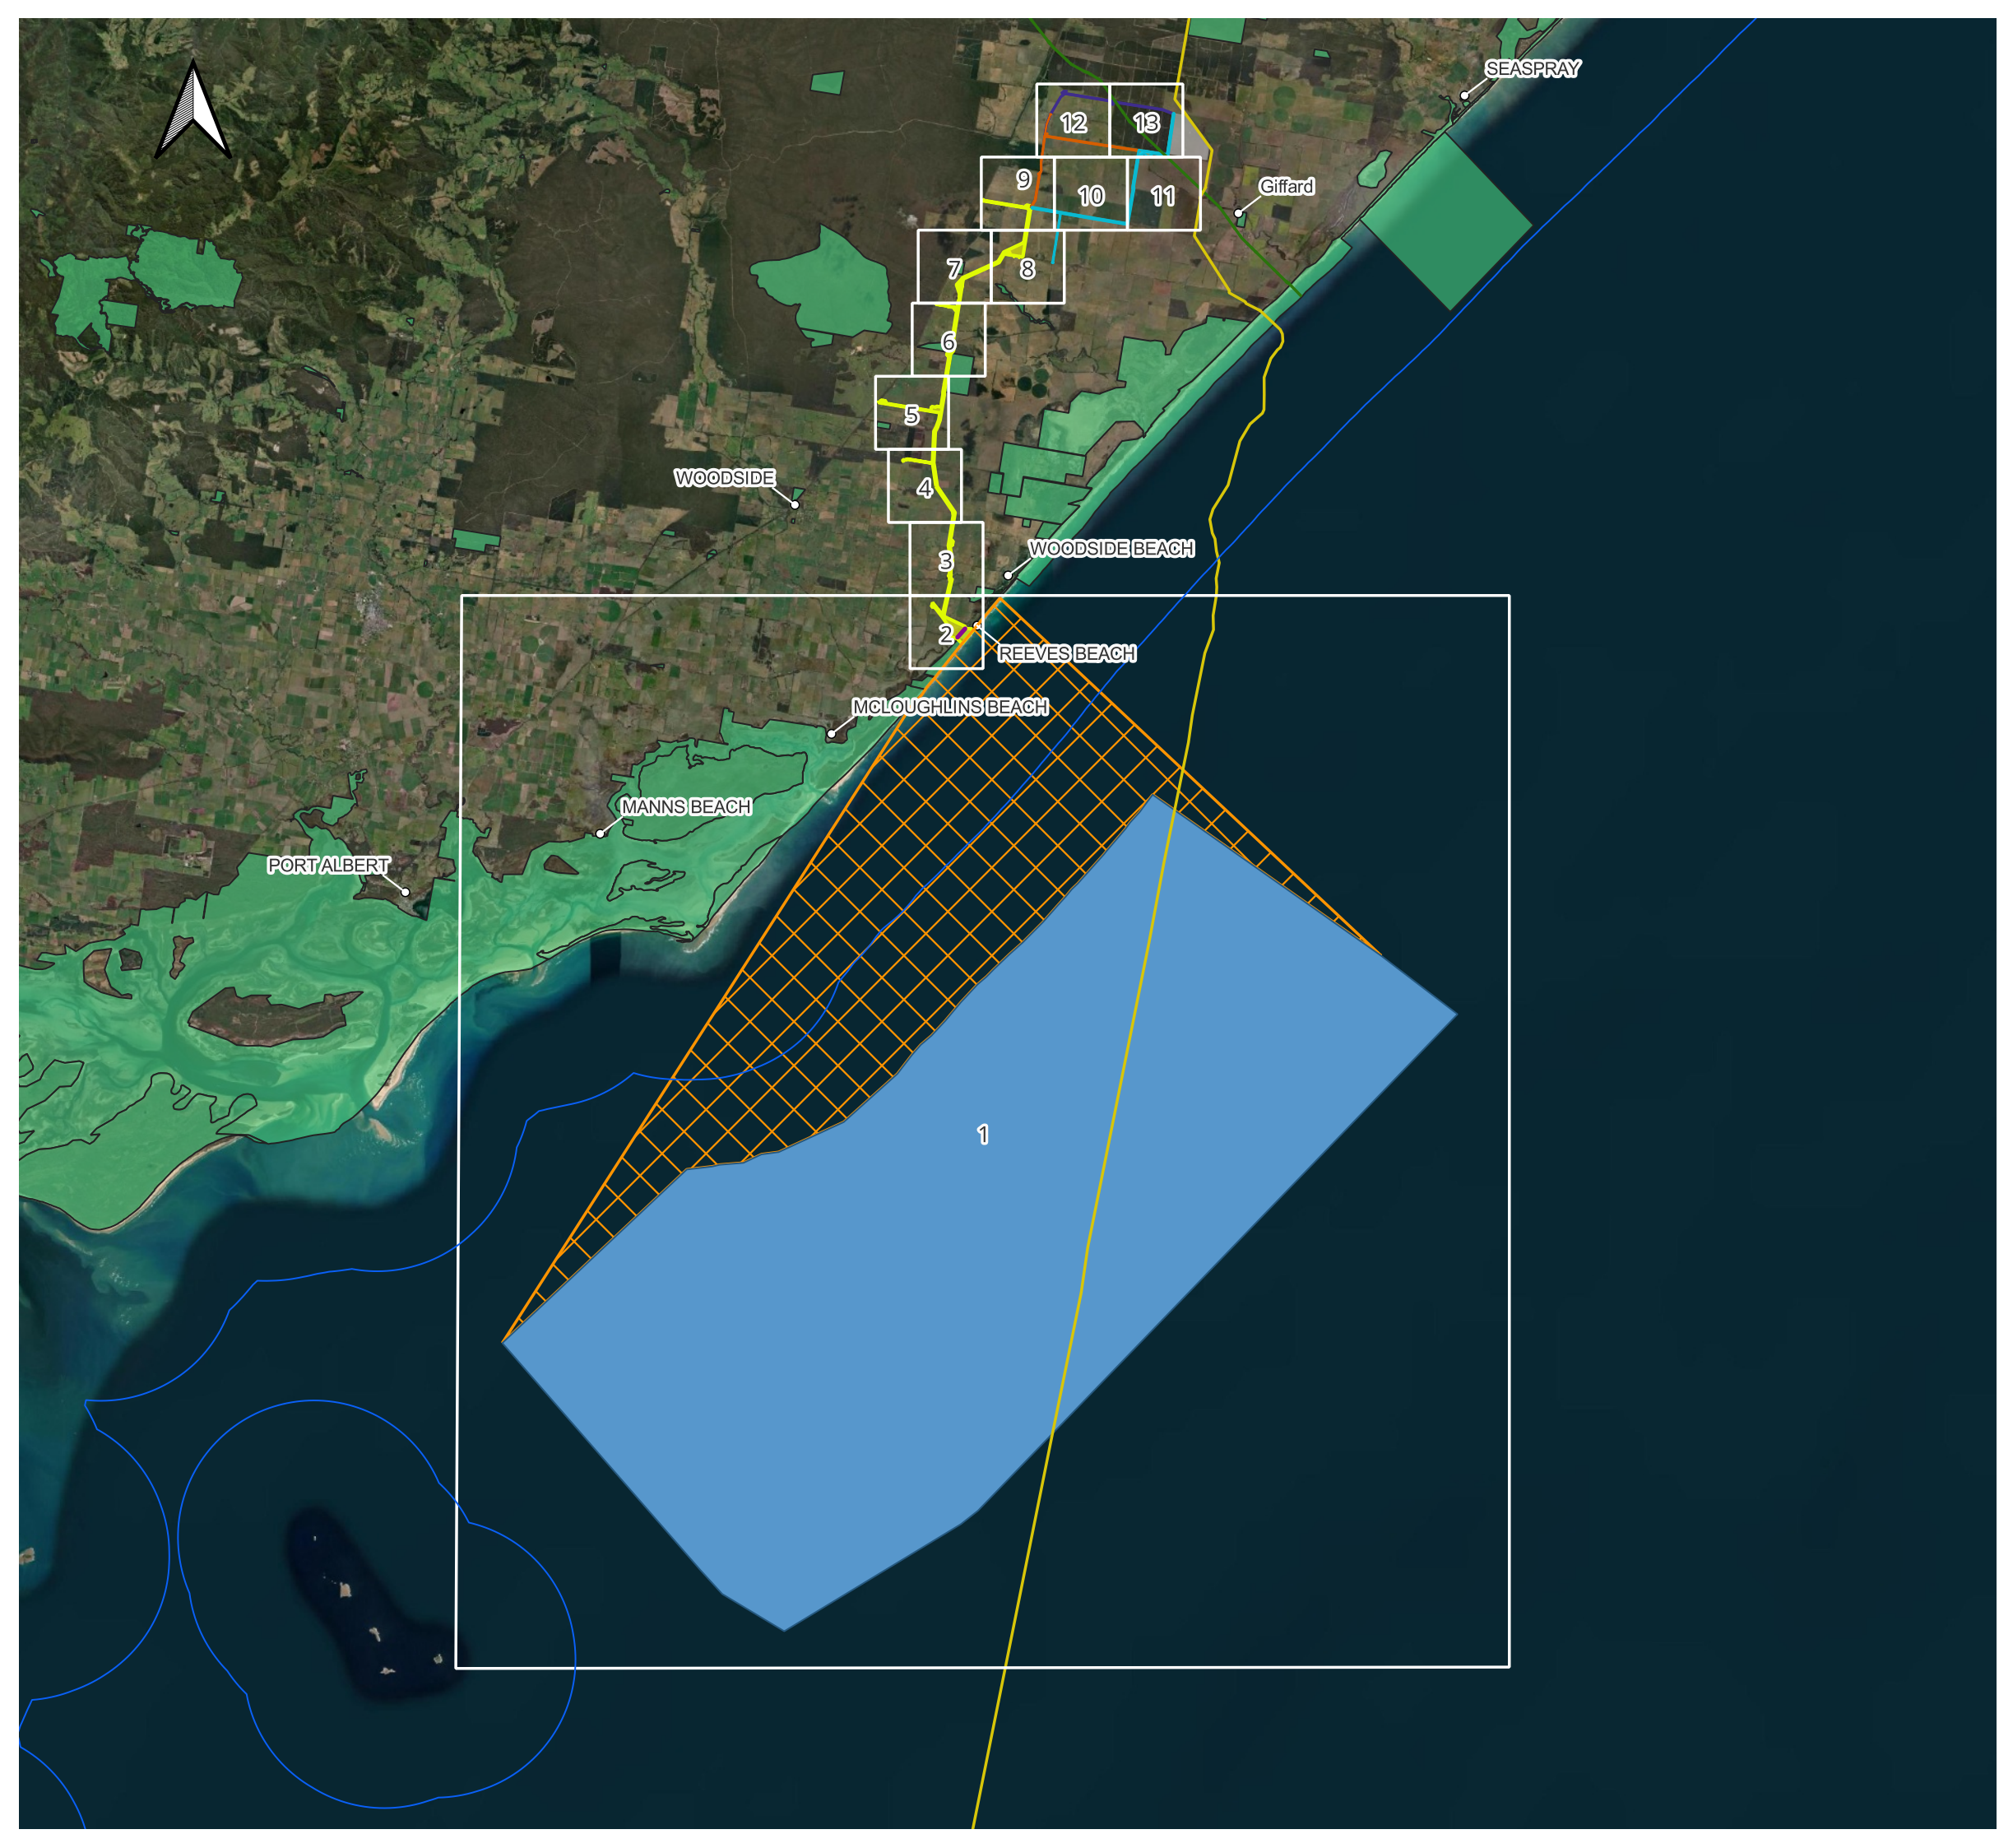

# Overview Map

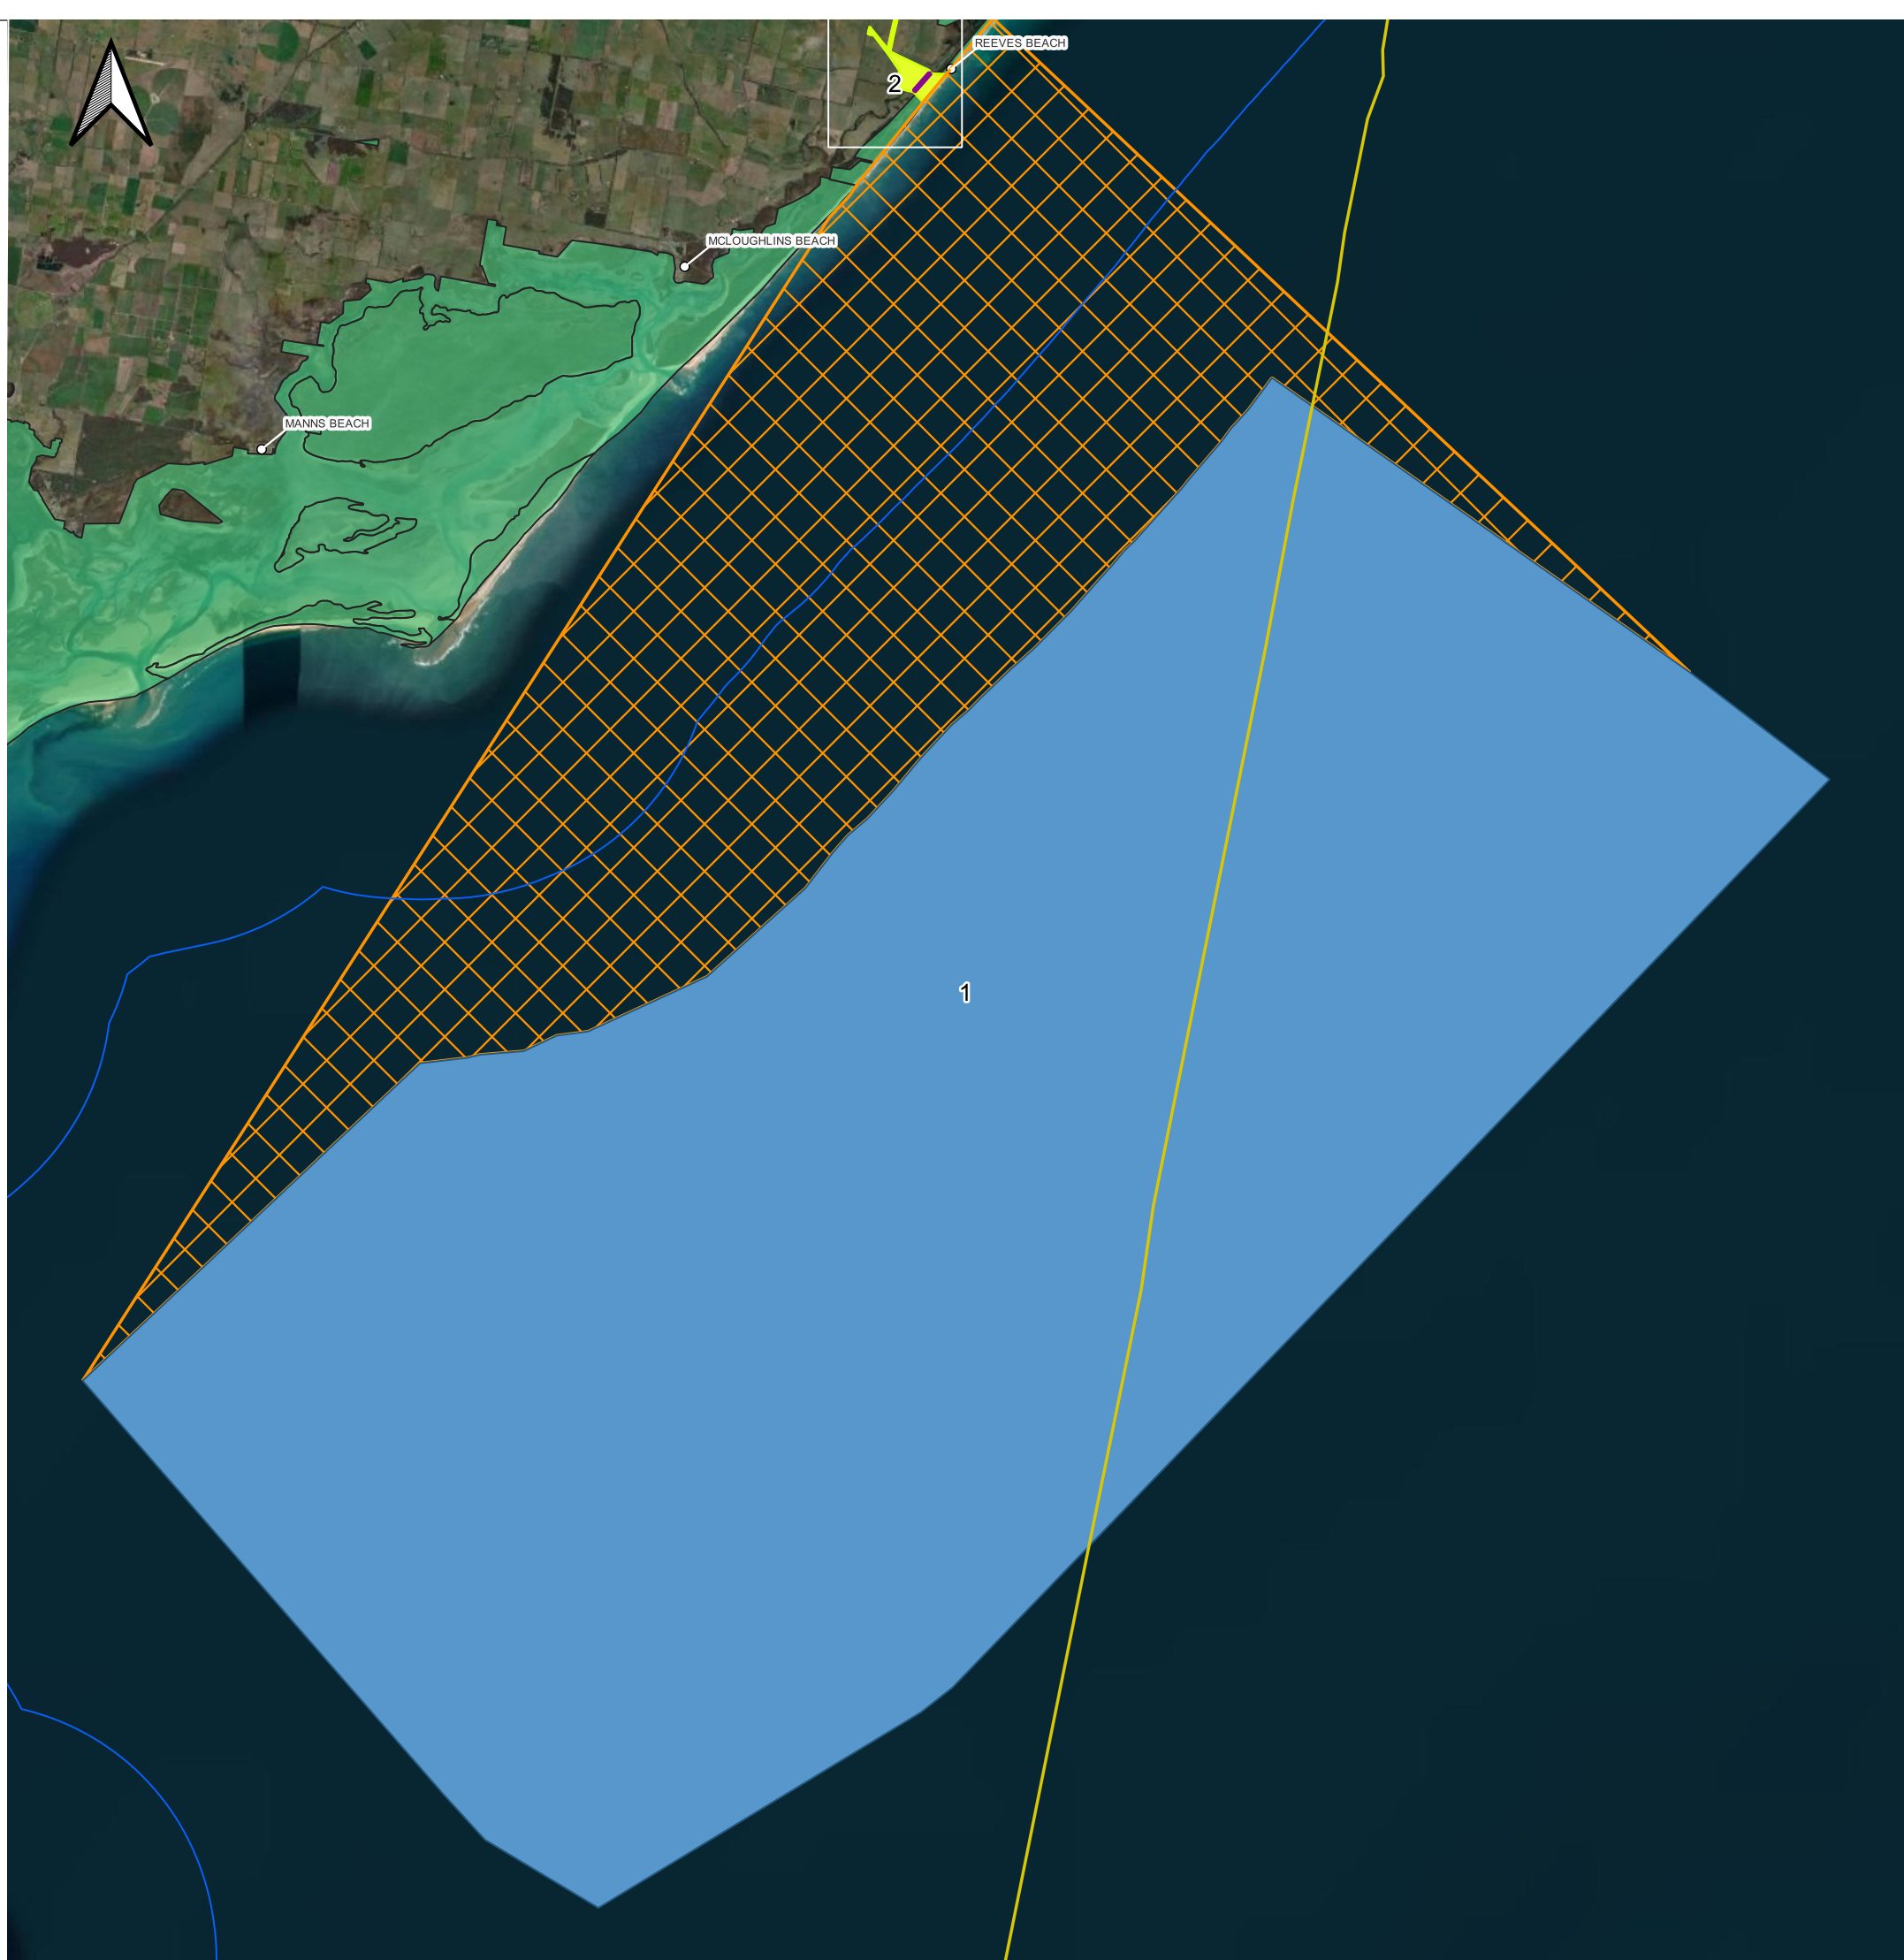

## Legend

-  Offshore wind farm area
-  Offshore export cable area
-  Onshore project area - common alignment
-  Onshore project area - alignment option AB
-  Onshore project area - alignment option C
-  Onshore project area - alignment option D
-  Proposed VicGrid connection hub
-  Parks and Reserves
-  Victorian coastal waters (3 NM)
-  Basslink
