How would you like to make your submission?

- I would like to enter it into a textbox

Your Submission

I strongly oppose the wind turbines out in our ocean because there are so many questions about their safety or whether even efficient:
- Marine mammals, seabirds and migratory species.

- Impacts on the marine environment and biodiversity.
- Underwater noise during construction and operation.
- Vessel traffic and associated impacts.
- Construction duration and cumulative disturbance over extended timeframes.
- Commercial and recreational fishing.
- Loss or displacement of fishing grounds.
- Navigation and maritime safety.
- Potential impacts on tourism and coastal communities.
- Whether environmental studies, mitigation measures and monitoring are adequate.
- Cumulative impacts when considered alongside other proposed offshore wind developments in Gippsland.
- Whether the project's overall costs and long-term economic impacts have been adequately assessed.
- Whether emergency response plans for offshore incidents, including turbine fires and extreme weather events, are adequate.
- Whether the environmental and safety impacts of turbine component failures, including blade failures, have been adequately considered.
- Whether clear decommissioning plans and financial assurances are in place for the end of the project's operational life.

Submission Declaration

 This submission does not contain any material that could be regarded as defamatory or offensive to any person
