Your Submission

I have fished and travelled to Port Albert and Port Welshpool and Wilson's Promontory for 50 years .

As an avid fisherman.an I am dismayed at the plane to industrialise the area .

It is a stunningly beautiful from onshore and also offshore there are few such views .There is such peace and tranquillity when

out fishing and boating.

I am concerned how the turbines can co exist with the impressive albatross on other large Seabird that are constant companions when drifting .

I am especially concerned for the yearly mutton bird migration that see thousands of birds converge on th e area to feed and rest for a few weeks.

Will the Humpback whales be able to continue to navigate safely through that very area that the turbines will be placed not only the pylons but the highly elevated magnetic fields.

I feel the turbines are too close to shore and right in the natural activity and migration paths of many amazing sea animals and birds .

A world class natural vista will be destroyed that provides peace and life to wildlife and people alike .

There is no better place to find peace and tranquillity, a rare commodity .

Please do not industrialise this incredible area and allow future generations the chance to visit ,observe some amazing views and unique wildlife and spectacular migrations.

Thank you
